

ABSTRACT

5           A stable skin care product comprising a first composition comprising about  
0.001% to about 10% of a retinoid; a second composition comprising about  
0.0001% to about 50% of at least one retinoid booster; a first compartment for  
storing the first composition, wherein the first compartment keeps the first  
composition out of contact with oxygen; and a second compartment for storing the  
10   second composition, the first and second compartments being joined together.
